Re: Application for additional Trade Names for FCC ID: Q8Z13EAQ8Z

Gentlemen:

We have reviewed your request concerning the addition of different Trade Names for the additional OEM Products to the above referenced grant of Certification. You have already received a grant of Certification for your Nauticast "X-Pack DS" (including the OEM-Product "RM 808 AIS") under the FCC Identifier Q8Z13EAQ8Z. The changes you have described to this device are considered Class I permissive changes pursuant to Section 2.1043 of the FCC Rules. No filing is required with the Commission for a Class I permissive change to add these additional trade names. Further Section 2.924 of the FCC Rules requires no grant of Certification to be issued for a different Trade Name for an already certificated device.

Accordingly the new OEM products do not require a filing with the FCC nor will a new FCC Identifier be issued in accordance with Sections 2.1043 and 2.924 of the Rules.

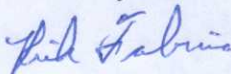

As we understand the situation, you will market the certified product also under the names:

ACR Electronics, Inc.  
Marine Technologies, LLC

**"GlobalWatch UAIS"**  
**"Bridgemate AIS"**

I trust that this has resolved this matter. If you have any additional questions about this matter, please contact the undersigned.

Sincerely

Rich Fabina  
Chief, Equipment Authorization Branch
